

[illegible]

Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: the control group and the experimental group. The control group received a standard diet and water, while the experimental group received a diet supplemented with 0.5% of the active ingredient. The subjects were then divided into two subgroups: the control subgroup and the experimental subgroup. The control subgroup received a standard diet and water, while the experimental subgroup received a diet supplemented with 0.5% of the active ingredient. The subjects were then divided into two subgroups: the control subgroup and the experimental subgroup. The control subgroup received a standard diet and water, while the experimental subgroup received a diet supplemented with 0.5% of the active ingredient.
